PUR PHOS 24

PROPERTIES

For systems with multiple issues of corrosion, scale, iron and manganese, PUR PHOS 24 is an effective and powerful blend of phosphates designed to mitigate these challenging conditions.

- Liquid Blended Phosphate
- NSF/ANSI Standard 60 Certified Product

APPLICATIONS

PUR PHOS 24 is formulated to address problems associated with corrosive water, soluble iron, manganese and calcium. It is designed to protect valves, meters, and distribution equipment from damage caused by corrosion and mineral buildup. PUR PHOS 24 will also help eliminate discolored water due to oxidized metals.

PROPERTIES

Appearance: Clear
% O-PO₄: 9
% P-PO₄: 11
Density: 1.20
pH: 6.84
Freeze point: <0° C

NSF/ANSI Std 60 MUL: 48 mg/L

ADVANTAGES

- Scale Control: scale inhibition
- Corrosion Control: on ferrous and non-ferrous metals and alloys
- Iron and manganese control
- Safe – NSF Certified
- Threshold Activity: low dosage requirements
- Chlorine Stabilization: reduces chlorine demand associated with metals
